JOB DESCRIPTION: DESIGN ENGINEER

Antonov is an international supplier of innovative powertrain products primarily for the automotive market and is looking for a Design Engineer to strengthen their existing design team.

The principal activity in design is the creation of concept schemes, models and detailed manufacturing drawings for automatic six speed transmissions using ProE Wildfire.

New programmes for further applications of Antonov Automotive Technologies are being sought by the commercial team and this activity requires design support for new enquiries.

KEY DUTIES & RESPONSIBILITIES:

- Produce design schemes.
- Produce 3D models.
- Casing modelling and detailing with production intent.
- Produce component drawings both prototype and production manufacture.

ESSENTIAL SKILLS/ EXPERIENCE:

- Experience in design for mass production.
- Full UK Driving Licence.
- Familiarity with manufacturing processes and drawing tolerancing.

PREFERRED SKILLS/ EXPERIENCE:

- Degree educated in mechanical engineering or related discipline.
- Minimum of five years experience in Automotive Transmission Design.

ESSENTIAL PC/ CAD SKILLS:

- ProE Wildfire

The position is available on a contract basis with rate negotiable subject to candidate experience. You must be able to start within four weeks and the initial contract will be for a three month period.

Rate: £26.00 hr Limited Company, dependant on experience.
