JOB DESCRIPTION: Transmission Calibration Engineer

Antonov is an international supplier of innovative powertrain products primarily for the automotive market and is looking for a Transmission Calibration Engineer to strengthen their existing Calibration Control and Electronics team.

Reporting to the Chief Engineer you will be required to support projects in Europe, China and other locations, the role will involve both clutch and gearshift quality calibration of automatic transmission equipped vehicles. The successful applicant will be required to be flexible with project work required various locations and at test tracks/centres within Europe and China/other locations in Asia.

KEY DUTIES & RESPONSIBILITIES:

ESSENTIAL SKILLS/ EXPERIENCE:

- Experience of working in Powertrain calibration over several years is desired with a keen aptitude for vehicle development via control system calibration
- An understanding and experience of automated transmissions, their mode of operation from both electronic and control perspectives is essential in the role and the prospective candidate must be able to work under pressure in demanding environments.
- Experience of calibration tools such as CANape or INCA
- HND or ideally degree educated in Automotive/Mechanical engineering or a related discipline, have a proven background in Powertrain development
- A full driving license is a necessity.

PREFERRED SKILLS/ EXPERIENCE:

- Working with multi-national suppliers/customers.
- Language skills, particularly Mandarin/Cantonese.

LOCATION UK/Asia

PC SKILLS PREFERRED:

- Matlab/Simulink will be an advantage, as will language skills, particularly Mandarin/Cantonese

The position is available on either a contract or permanent basis with salary/rate negotiable subject to candidate experience.

Salary: Circa £30 - 40,000 negotiable dependant on experience.
